

Make it Flow - Sample Test Document

Welcome to Make it Flow!

This is a generated test PDF document for the Flow application. Make it Flow is designed to take any complex PDF and extract its text beautifully, preserving the original reading order, detecting headers, paragraphs, and even bypassing messy multi-column layouts using advanced Apple Vision frameworks.

Here are some features you can test with this document:

1. Text extraction accuracy
2. Sentence boundary repair using local LLM
3. EPUB compilation speed and formatting

If you can read this in your EPUB, the conversion was a huge success!

Enjoy testing your amazing new app.
